

## **A few words about our municipality ...**

The new Municipality of Domokos, established by the application of N.3852/2010 includes the former municipalities of Domokos, Xyniada and Thessaliotida which are now designated as Municipal Units. The population of the Municipality is 11.205 people.

The seat of the municipality is the local community of Domokos which is built amphitheatrically in a panoramic site with a view of the plain of ancient Thesaliothidas and Estiothidas as far as the mountains of Agrafa and Kozakas, the ancient homeland of Asclepius. The view is breathtaking and one can gaze for hours at the beautiful scenery that unfolds before them.

The Municipality of Domokos is a historic place with a rich cultural and folklore tradition. The whole area has significant historical and strategic presence in Hellenistic times.

The inhabitants of the municipality are mainly engaged in farming (sheep, cattle), the production of dairy products such as the exceptional katiki, and agriculture with their main activity the cultivation of cereals, maize, alfalfa, cotton, pulses (lentils Vouziou) and various vegetables (mainly industrial tomato). In recent years, the local farmers experiment in new crops, such as energy crops (sunflower, cardoons, etc.), but also in tree crops such as walnut, the pomegranate, and apple trees.

The cultivation of grapevines has been increasing dynamically lately, since the special microclimate of the area gives the resulting products (wine, raki) excellent quality and excellent features. However, we should not fail to mention the cultivation of aromatic plants which has started systematically, with products (mountain tea, oregano, mint, etc.) of high quality achieving a great demand throughout Greece and not only.
